Network Engineer Job Description

Position: Network Engineer

Description: Express Systems Integration (ESI), a leading Systems Integrator in Central New York, is actively seeking a highly motivated Network engineer with a combination of outstanding technical expertise and communication skills needed to successfully implement and support a wide array of today's leading network technologies.

Job Description: The Network engineer will provide customer facing post-sales support and implementation of networking technologies for a variety of small and medium business customers in the Central New York region.

Key Responsibilities:

- Implement and support network solutions
- Working with ESI Sales and Technical delivering solutions.
- Stay current in various network and server technologies
- Working closely with key customers to understand their needs and provide appropriate solutions to their business needs

Requirements:

- 3+ years of progressive technical responsibilities.
- Proficient in server hardware and OS solutions.
- Microsoft, Novell, Citrix, Cisco or other top manufactures certifications
- Server hardware certification from leading manufactures a plus.
- Ability to work both independently and as a team player
- Ability to communicate well both verbally, as well as in a written format
- Ability to learn about new technologies and solutions.
- Excellent customer presence.

Benefits: ESI offers a comprehensive benefit package including: medical, dental, life insurance, 401k, paid holidays, and vacation and personal days.
